JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 20	Gyller	14	1	0	0
23	Habil.	16	0	0	0
25	Anselm.	41	0	11	0
25	Chelston.	33	8	0	0

Steamship Chelston bound for Boston via Bluefields.

JUNE 1, 1905.

I have to report another death from yellow fever, making three deaths in all. The situation here at present is 2 cases on hand. Three have died and there are several suspects, 2 of which I think will prove to be yellow fever. The last case reported is that of the surgeon to a fruit company. This case has been favorable from the beginning, and he should recover. Since the outbreak of yellow fever at this port the town is receiving a good cleaning and oiling. Every house in which there is any kind of sickness is being fumigated, and patients are all being treated under mosquito bars.

ITALY.

Report from Naples—Inspection of vessels—Infectious diseases in Italy.

Passed Assistant Surgeon McLoughlin reports, May 29, as follows:

24	Napolitan Prince	36
		87	87

For the week ended May 18, 1905, following reports were officially registered:

Smallpox.—There were reported 2 cases in 2 communes in the province of Lecce; 5 cases in the province of Vicenza; 2 cases in the province of Cosenza; 9 cases at Palermo; 12 cases at Catania, and 10 cases in 4 communes of the province of Catania.

Measles.—Epidemic at Solopaca (Benevento) and at Latiano (Lecce).

Scarlatina.—There were reported 20 cases at St. Giovanni Gemini; 11 cases at Cammarata in the province of Gorgenti.

Enteric fever.—Very few cases in few provinces. No cases of other contagious diseases were reported during the week under consideration.

MEXICO.

Report from Tampico—Inspection and fumigation of vessels—Mortuary statistics.—

Acting Assistant Surgeon Frick reports, June 5, as follows:

Week ended June 3, 1905:

Inspected and passed steamships	3
Inspected and passed personnel (crews)	235
Inspected and passed passengers	123
Fumigated and passed steamships	5

The American steamship *Santiago*, one of the above-named steamships inspected and passed, sailed via Cuba, and was therefore fumigated by the Cuban medical officer stationed at this port.

Mortuary report.

Pernicious fever, 2; uræmia, 1; tuberculosis, 3; intermittent fever 1; diarrhea, 1; aneurism aorta, 1; malarial cachexia, 1; atrophic cir-
